Game Overview

Alan Cake is a short 2D top-down action-comedy game built around the three jam themes, Comic, Twist, and Light.

One day Alan woke up and see he's surrounded by cake monsters, eventually he find out they can be defeated by flashlight by aiming it at them. When defeated, small part of their darkness is dropped, called Dark Orb. Collect them enough to unlock the Dark Flashlight and place it to end the curse over the cakes.

After collecting enough Dark Orbs, player upgraded his flashlight into Dark Flashlight. The moment when I place the torch to end the darkness, but rather than any magical light, torch emits Disco light. And all the cake present there stopped attacking and started bouncing.

Eventually Alan realises it was all his nightmare, he was diabetic and want to eat as much as cake he want but they all turned evil and attacking him.

Theme Integration

COMIC

The game uses a humorous contrast between a serious dark action game and completely ridiculous cake enemies. The player initially fights what appear to be dangerous monsters, but these terrifying enemies eventually start bouncing and dancing when exposed to disco lights.

LIGHT

Light is the main gameplay mechanic. The player uses the flashlight to reveal and attack enemies, collect the energy they drop, and progress through the game.

Eventually, the flashlight becomes the Disco Light, which changes how the enemies behave and provides the solution to the game's conflict.

TWIST

The player spends most of the game believing that the cake monsters are the enemy. The final Disco Light reveals, Instead of attacking the player, they become harmless and start dancing. This changes the player's understanding of the enemies and gives the game its final reveal, that is it was all his nightmare.

Core Gameplay Loop

Explore → Find Cake Monsters → Use Light → Defeat Cakes → Collect Dark Orbs → Unlock Disco Light → Discover the Twist → Cake Party

Planned features:

- 2D top-down player movement
- Flashlight/light-based combat
- Cake monster enemies
- Enemy chasing and attacking
- Light-energy orb drops
- Orb collection system
- Increasing difficulty
- Final Disco Light mechanic
- Cake dancing
- Simple UI for energy
- Sound effects and music
- Final twist and cake-party ending
- WebGL browser build for itch.io
